Every detail guaranteed™

A photograph of a two-story house with yellow horizontal siding and a dark brown roof. The house features a large garage with a dark brown double door that has a multi-pane window at the top and a large 'X' pattern on the lower half. The garage is framed by white trim and has two black lantern-style light fixtures on either side. A semi-transparent dark blue rectangle is overlaid on the upper part of the image, containing the text "COMPLETE COLLECTION" in white, all-caps, sans-serif font.

3 STEPS TO CHANGE YOUR GARAGE DOOR

1 CHOOSE YOUR STYLE

Whatever style you desire, you will find it with Garaga. Consider the different possibilities of **model patterns**, **layouts** and **windows** on the other side of this brochure and make a choice from among the models of our 3 different looks.

TRADITIONAL

Standard+ Shaker CC, 9' x 8', Ice White

CONTEMPORARY

Standard+ Moderno Multi, 16' x 7', Black, Azur windows / Coordinated with entry door from Novatech with Azur glass

CARRIAGE HOUSE

Eastman E-21, 9' x 8', Moka Brown doors and Ice White overlays, 8 lite Panoramic windows

2 CHOOSE YOUR COLOR

Whether you opt for a classic color or one more modern, choose one that blends well with the other exterior features of your home.

STANDARD

Ice White[†]

Desert Sand[†]

Claystone[†]

Dark Sand

Moka Brown

PREMIUM

Charcoal

Evergreen

Charcoal similar to Slate #523
Evergreen similar to Bonneville Green #598
Black similar to Black #525
American Walnut: N/A
Chocolate Walnut: N/A

3 CHOOSE YOUR CONSTRUCTION

From among our varied garage door compositions, you are sure to find the insulation level (R value) and air infiltration performance (transfer of heat or cold between inside and outside) that you require.

R-16 AND R-12 THERMAL INSULATION

MODELS: TOWNSHIPS COLLECTION, STANDARD+, ACADIA 138, H-TECH AND TOP TECH

1 INTERLOK™ JOINT

Located between sections, this joint blocks air infiltration due to its triple-contact weatherseal.

Makes sections very strong as it is mechanically interlocked and not bonded.

2 WOOD END BLOCKS

One of the most effective thermal breaks, they eliminate any transfer of cold or heat between materials.

3 REINFORCED METAL PLATES

With 14-gauge thickness, they are used to solidly attach hinges, handles and operator bracket.

4 HIGH-PERFORMANCE WEATHERSTRIPPING

Our weatherstripping ensures increased weathertightness and stays flexible through the coldest temperatures.

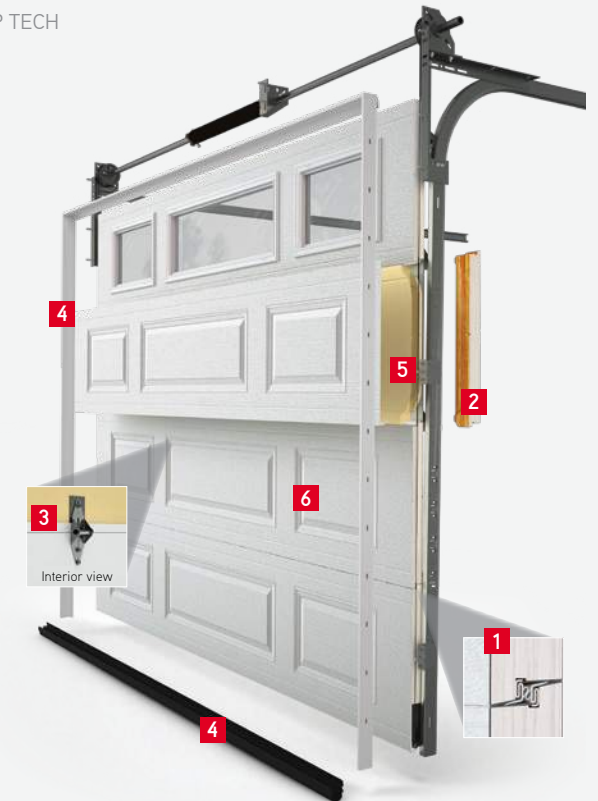

5 POLYURETHANE

High-pressure injected foam provides R-16 thermal resistance for 1 3/4" doors or R-12 for 1 3/8" doors.

Because it adheres to the section walls, it provides a high level of rigidity to the door.

6 CONTINUOUS WOODGRAIN

Up close or at a distance, our embossed woodgrain finish is flawless and very refined.

RUGGED & DURABLE

THERMALLY EFFICIENT

REFINED DESIGN

R-10 THERMAL INSULATION

MODEL: TRIFORCE

1 Polystyrene insulation bonded to 2 steel panels and grooved to match the embossed panel for more strength.

2 InterStop™ joints prevent air infiltration and are firmly attached to sections.

3 Wood end blocks are one of the most effective thermal breaks.

R-6.6 INSULATION OR NON-INSULATED

MODELS: DUALFORCE AND UNIFORCE

1 24-gauge galvanized steel with a coat of baked-on paint for a high durability door.

2 Polystyrene insulation available as an option for an insulation value of R-6.6.

See all the possibilities by creating your garage door before buying it at garaga.com/designcentre

WHY HAVE MORE THAN 1.7 MILLION GARAGA DOORS BEEN INSTALLED SINCE 1983?

SUPERIOR PERFORMANCE

Get a product that exceeds your expectations. Our garage doors, inspired by Canada's severe weather, are **energy efficient** as they are first and foremost weathertight. They are **strong** and constructed with long-lasting components, rigorously selected to give a flawless finish, both up close and at a distance.

ONE OF THE LARGEST SELECTIONS IN THE INDUSTRY

With **thousands of possible combinations**, you are sure to find the garage door you are looking for. Select style, color and much more by visiting garaga.com/designcentre. There you can create and view online the perfect door to enhance your house and be assured you're making the best decision.

A PICTURE IS WORTH A THOUSAND WORDS

So that you can make an informed decision, all the options you want can be **quickly** calculated then presented to you in a **clear, illustrated quotation**. Once your garage door has been chosen, your quotation is automatically transmitted to our factory to be **precisely custom-crafted**.

LiftMaster®

Quiet and reliable garage door openers

ELITE SERIES®

- Ultra quiet
- Belt or chain drive
- 3/4 HP, AC or DC power
- Ultra quiet
- Jackshaft

USEFUL ACCESSORIES

Keyless and wireless entry system

- Open or close your garage door without using a remote control and program it with a 4-digit code

Automatic Garage Door Lock

- To ensure greater security for your home, can be activated with your smartphone

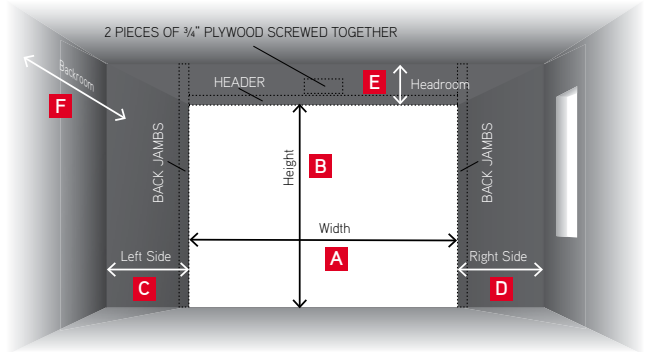

Consult garaga.com to view all available accessories

myQ® Technology

Allows you to open or close your garage door from anywhere by using a smart device such as a watch, telephone, tablet or laptop.

TAKE MEASUREMENTS

1) Measure existing door opening's width **A** and height **B** in feet and inches. This determines the size of door needed. Never base your measurements on the size of the existing door but on the door's opening instead.

2) Measure for sideroom, left side **C** and right side **D**.

- 6 inches is required on each side for installation of vertical track.
- Make sure no entry door will interfere with the horizontal track of the door.

3) Measure area labeled "headroom" **E**. Distance between the top of the door opening and the ceiling (or floor joist);

- 8 1/2" is required for standard extension spring.
- 12" is required for standard torsion spring.
- Add 2" more for electric opener.
- If you have restricted headroom, special hardware is available.

NOTE: If door height extends above the opening, the headroom measurement should be taken from the top of the top section to the ceiling.

4) Measure area labeled "backroom" **F**. Distance is measured from the garage door opening toward the back wall of the garage.

- Door height plus 28" is required.
- Additional backroom (door height + 48") may be required for installation of an automatic garage door opener.
- Make sure no lighting or other material will interfere with the door sections when moving.

Getting the opening ready

1) Make sure the size of the opening matches the size of the door.
For example: a door of 9' x 7' needs an opening of 9' wide by 7' high.

2) The position of the header and back jamba (2" x 6") are very important. The header must be flush with back jamba (on the same plane). The back jamba must be perpendicular, plumb and square

For more details, visit garaga.com/measures

YOUR GARAGA DOOR IN 3 STEPS

CHOOSE THE STYLE

So that your garage door is exactly what you want, choose from our traditional, contemporary and carriage house styles. Next, select your windows from among our many available models.

CHOOSE THE COLOR

To coordinate your garage door with your entry door, or to add an interesting element to the front of your home, choose one that pleases you from our stylish colors.

CHOOSE THE INSULATION

We offer 5 choices of thermal insulation. Select the one best suited to how you will use your garage.
